

## Plant Based Packaging Solutions

**Packaging pollutes.** We would like to be transparent about the fact that the process of manufacturing packaging and the packaging itself impacts the environment. However rather than accepting this fact, we use it to inspire us to find new solutions, to test, refine, research and bring to market innovative packaging solutions made from plants. “ Ingeo.”

By choosing to use compostable, disposable packaging made from plants, you are helping to save significant quantities of natural resources, while at the same time reducing the amount of greenhouse gases released into the atmosphere.

Our products take less energy to make than many of their traditional Alternatives.

Our goal is to influence change by promoting packaging made from annually renewable resources that seamlessly replace oil based packaging without adding cost or requiring people to think or act differently. We feel that if given an economically viable and cost effective choice, the status quo will choose green.
